

## 2 Restaurant

Pier Restaurant - Exterior View

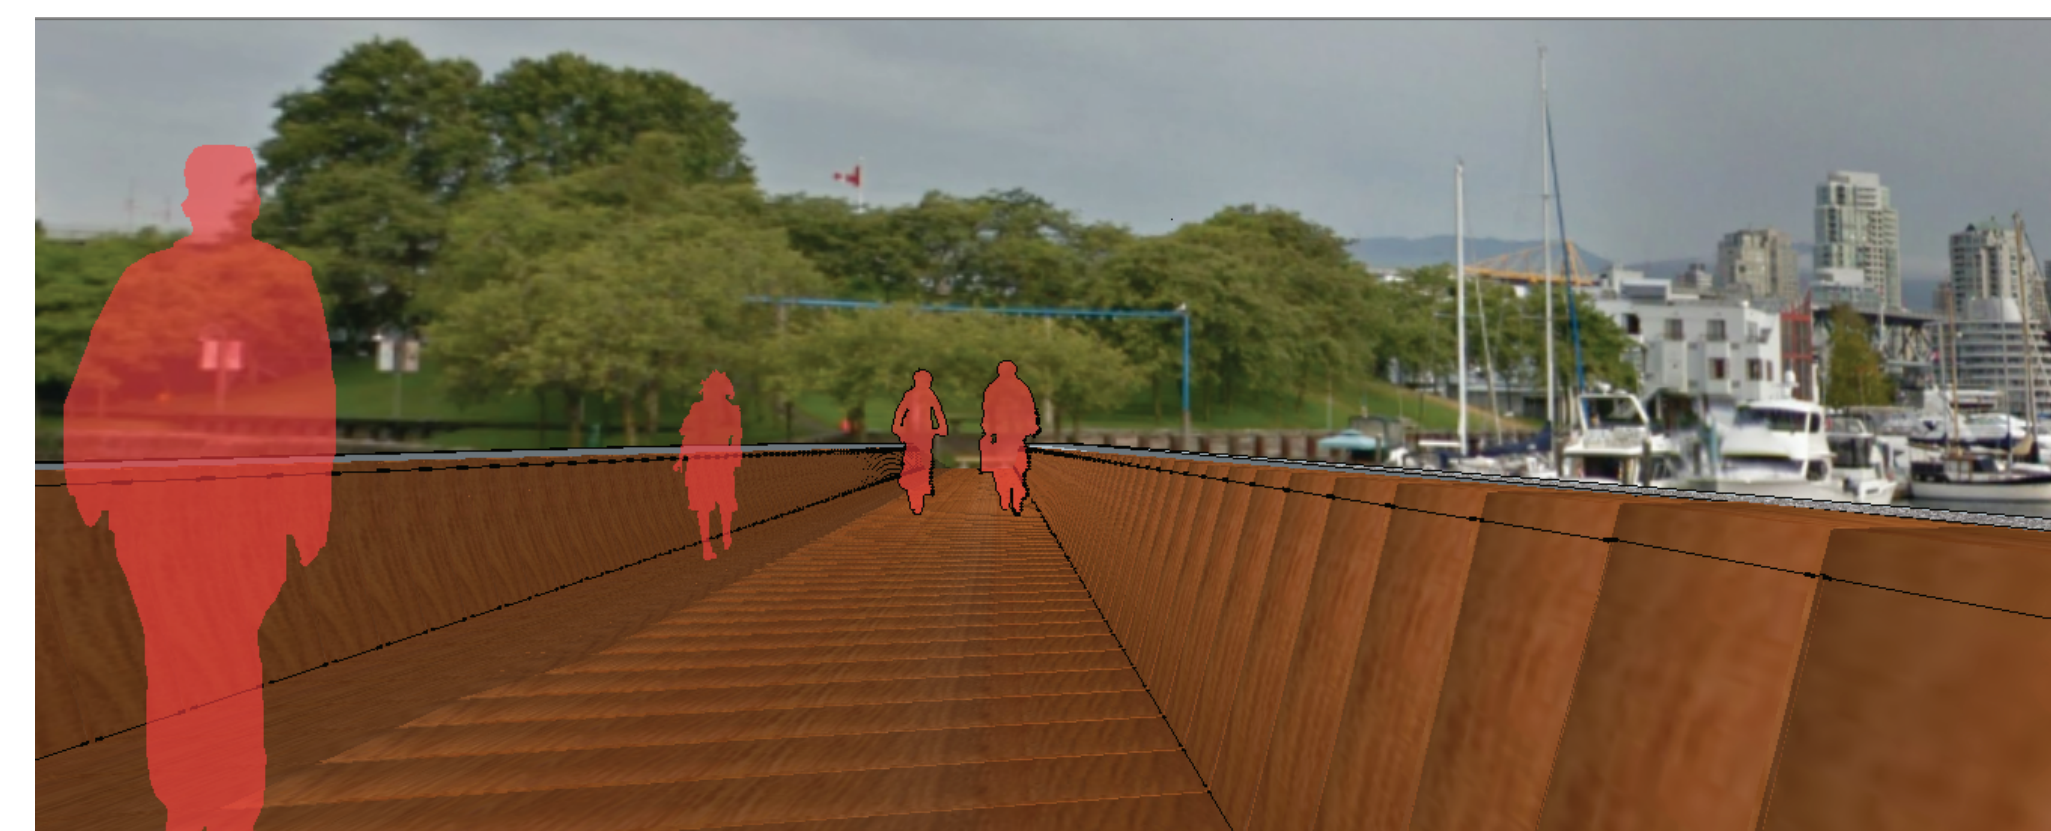

Pier Restaurant - Interior View

- Retains & attracts a young demographic by creating evening vitality
- Creates a major all-weather destination with striking views of False Creek & downtown Vancouver
- Ensures project financial sustainability

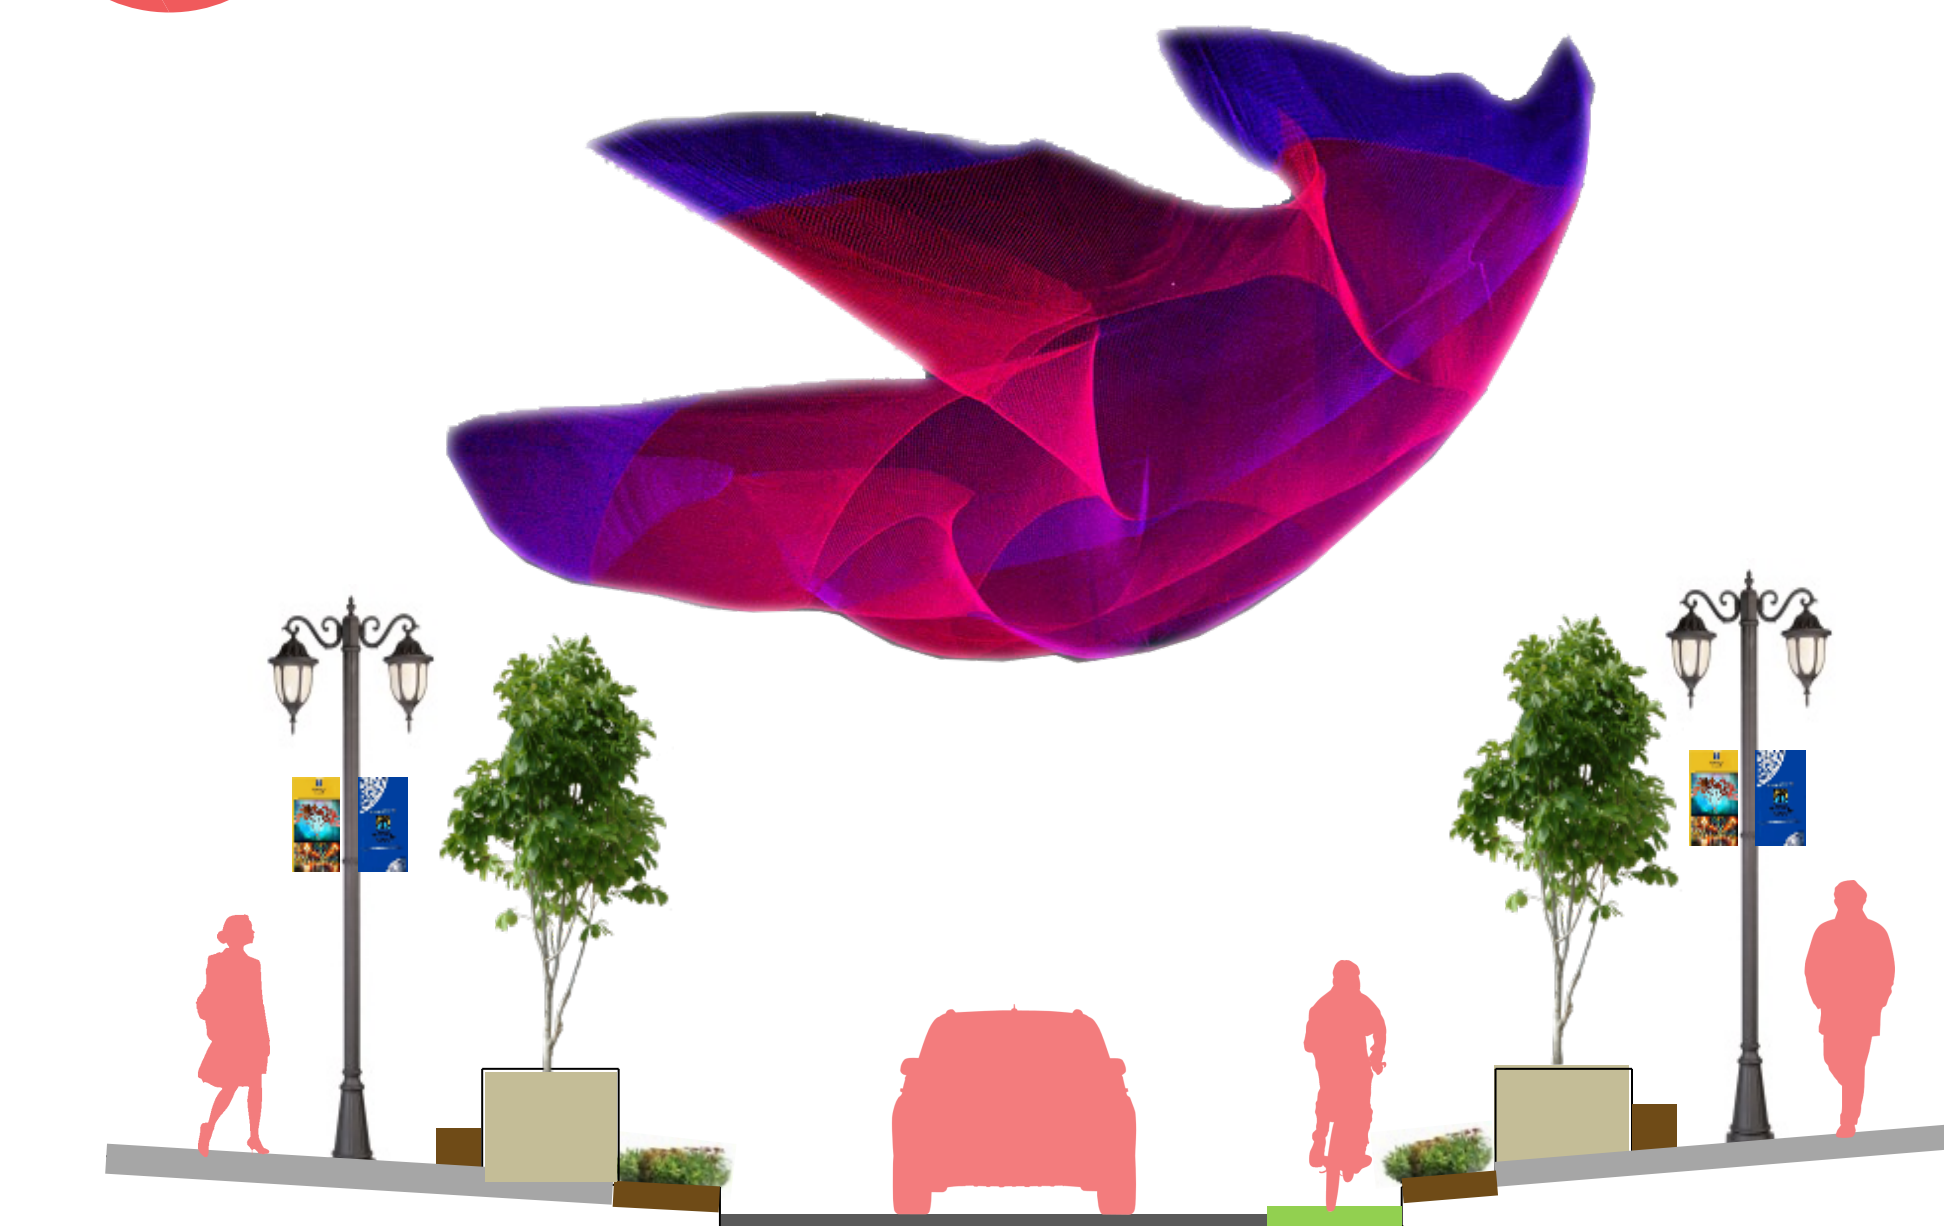

## 4 Pedestrian Bridge

- Provides a convenient pathway between the Sea-Wall & the east side of Granville Island
- Utilizing concrete materials to reduce emissions & costs associated with transportation, while establishing connectivity with Granville Island services
- Repurposed wood slats are used as cladding in order to maintain focus on a sustainable initiative

View From Pedestrian Bridge - Towards Granville Island

## 6 Street Upgrade

Cross-Section of Johnston Street

- Provides safer walkways for pedestrians, increases green space, improves traffic control, & creates connectivity between the east & west side of Granville Island
- Suspended art structure reinforces Granville Island as a center for art & culture while animating the east side of the island
